

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

STATE OF INDIANA.

EIGHTH ANNUAL REPORT

OF THE

DEPARTMENT OF INSPECTION

OF

MANUFACTURING AND MERCANTILE ESTABLISHMENTS, LAUNDRIES,
BAKERIES, QUARRIES, PRINTING OFFICES,
HOTELS AND PUBLIC BUILDINGS.

TO THE GOVERNOR.

1904.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1905.

CHIEF INSPECTOR.

DANIEL H. McABEE.....Muncie, Delaware County.

CHIEF DEPUTY INSPECTOR.

DAVID F. SPEES.....Vincennes, Knox County.

STENOGRAPHER.

EDNA ROBINSON.....Lafayette, Tippecanoe County.

DEPUTY INSPECTORS.

HARVEY A. RICHARDS.....Muncie, Delaware County.

JOSEPH H. CLARKE.....Indianapolis, Marion County.

THOMAS S. WILLIAMSON.....Anderson, Madison County.

JAMES H. ROBERTS.....South Bend, St. Joseph County.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
February 17, 1905. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, February 18, 1905. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

D. E. SHERRICK,
Auditor of State.

FEBRUARY 18, 1905.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

UNION B. HUNT,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, February 18, 1905.

DANIEL E. STORMS,
Secretary of State.

Received the within report and delivered to the printer February 18, 1905.

THOS. J. CARTER,
Clerk Printing Bureau.

EIGHTH ANNUAL REPORT
OF
DEPARTMENT OF INSPECTION.

Hon. J. Frank Hanly, Governor of Indiana:

Sir—In compliance with the law establishing this Department and defining the duties of the Chief Inspector, I submit to you the eighth annual report. This contains a full and fairly accurate report of the work done by officers of this Department, with such suggestions and recommendations as appear to be in line with our work—that of caring for the health, comfort and safety not only of those employed in manufacturing, mercantile and other establishments, but of those congregated in places of amusement or in schools, colleges, sanitariums, etc.

The conditions of some of the more important industries of the State have not been as satisfactory as in 1903, the metal and wood establishments showing quite a decrease in the number of employes. This can be accounted for by the failure of natural gas. The decrease in the number of wood workers can be partially accounted for by scarcity of raw material. Quite a number of glass factories, formerly in the gas district, have found new locations in the coal fields. The loss in this industry is scarcely noticeable. Other industries, more especially textiles and printing, have made gains so that the workmen found in the State is less than two thousand below that of 1903

The Legislature has seen fit to pass several laws, the enforcement of which is placed in our hands, without providing for additional deputies. For the proper enforcement of the laws now on the statutes, provision should be made for not less than three additional deputies, and also an assistant clerk in the office. Our inspectors

have much more to look after than the inspectors of Illinois, yet they have eighteen deputies and an office force of five; Ohio has fifteen deputies and four in the office; Michigan fifteen deputies and four in the office; Wisconsin eight deputies and four in the office; Pennsylvania thirty-nine deputies and five in the office; New York fifty deputies and five in office; Massachusetts twenty-eight deputies and three in office, while Indiana has five deputies and one stenographer. Should we be granted an increase of three, we would be able to discharge our duties in a much more satisfactory manner.

The people in all parts of the State recognize the importance of having some department to look after the enforcement of laws created for their safety. So far, the Department has been spoken of very highly by persons who have compared conditions in other states with those in Indiana.

That the report may not be too voluminous, each subject is treated as concisely as possible.

CHILD LABOR.

There are but few changes needed in this law. Ten hours per day is too long a time for girls between the ages of fourteen and sixteen years to be on their feet, as they are compelled to be when employed as cash girls in the department stores. It would be to the interest of health and morals if the hours were shortened to fifty-four hours per week. For the same reason the law should prohibit the employment of boys under fourteen from delivering either messages or packages. It should also prohibit the employment of those under sixteen at occupations where life and limb are endangered.

ACCIDENTS.

The number of serious accidents that have been reported to this Department is very nearly the same as last year, six hundred and eighty-six for 1904 and six hundred and ninety for 1903. Of the six hundred and eighty-six, thirty-five were fatal as against forty-one for 1903. The most encouraging feature to this Department is that these accidents have caused the loss of eleven hundred and thirty-two days less time than did those of 1903. The wages paid during disability by the manufacturers was \$3,723.00 less than the

previous year. The medical fees were reduced from \$10,639.00 in 1903, to \$6,544.00 in 1904, a saving to the manufacturers of \$4,095.00, for they nearly always pay these fees. The average loss in wages for each accident in 1901, 1902 and 1903 was \$32.86, and for 1904, \$19.59.

These results have been obtained by the use of safety devices provided in compliance with the orders of this Department.

PAYMENT OF WAGES.

It is of the utmost importance that a measure of some kind be placed on the statute books of the State governing the payment of wages, not that our resident manufacturers do not pay their employes regularly, but because of some foreign corporations doing business in the State who literally rob their employes of from 10 to 20 per cent. of their wages by means of checks and discounts, which under the present law can not be prevented.

INLAND LAKE NAVIGATION.

The law passed by the last General Assembly for the inspection of the boilers, engines and machinery of boats on these lakes and rivers was a wise movement, but should have required a certain number of small boats, rafts and life-preservers sufficient for the use of those on board in case of accident.

It is true that neither our lakes nor boats compare with many others in size, but there are gala days when the boats are crowded beyond their capacity with women and children, just as was the Slocum, and in case of fire or other accident, as many lives would be lost in proportion to their numbers as there were when the Slocum was burned in New York harbor.

The method of making these inspections is not satisfactory. This Department issues the authority to persons to do this work, and for this reason would be held responsible for the results, yet we are not familiar with either their capabilities or characters only as they are certified to by persons unknown to us. Therefore, we respectfully recommend that the law be amended as suggested, and that these inspections be made by a deputy of this Department appointed for that special and other duties which may be assigned him by the Chief Inspector.

THE MANUFACTURING OF EXPLOSIVES.

This is an industry that is growing quite rapidly. There are four establishments in the State employing two hundred and fifty persons who are engaged in the manufacture of dynamite, blasting powder and fireworks. When an explosion occurs, the results are usually fatal, and for this reason the cause can not be ascertained. The Department, therefore, can only recommend, in addition to taking all precautions known, that extreme care be taken in the employment of only such persons as will implicitly obey instructions, for the least disobedience of orders will cost them their lives.

There have been five fatal accidents caused by explosions in the last year, which is 2 per cent. of those employed, as compared with .02 in all other occupations.

THEATERS AND PUBLIC BUILDINGS.

The great loss of life in the Iroquois theater, of Chicago, brought many requests for us to visit theaters and places of amusements. We promptly responded and made the inspections. Many changes were ordered that have added to the safety of the people. This has been a difficult task. Some of these buildings were remodeled from various structures designed for other purposes. The exits were insufficient, often reached by long, narrow corridors with narrower aisles leading in almost any direction but to the exits. In others, even where the building was constructed for a theater, the exits were not of sufficient capacity for those on the main floor, yet there were no others for those in balcony and gallery. In such places, in case of a panic from any cause, there would be as many deaths in proportion to the number present as there were in the Iroquois disaster.

In all halls or theaters situated above the first floor with a capacity of three hundred and fifty or more the stairs should be without turns and not less than twenty inches in width for each one hundred persons. When the capacity of such places is more than five hundred, there should be at least two exits not less than five feet in width, with stairs of equal capacity. Balconies and galleries should have independent exits leading to the street. The law at

present provides only that sufficient means of exit shall be provided for such buildings, leaving the question as to what is sufficient an open one. Means for extinguishing fire should also be compulsory.

ELEVATORS.

In the modern eight, twelve or more storied buildings, the elevator has become one of the menaces to life and limb. Thousands of persons are daily raised and lowered at a speed entirely beyond the necessity of the occasion. Notwithstanding that the mechanism has apparently been perfected, accidents are becoming more frequent, and with the increased use of the elevator greater precautions should be exercised and safeguards provided for the protection of life and limb.

No elevator should be permitted to be operated with less than two cables, and passenger lifts should have four or more. The law makes it the duty of this Department to inspect the cables, gearing, etc., of those in manufacturing and mercantile establishments, printing offices and laundries. This we have attempted to do. Many orders for replacing cables and gates have been issued. Owing to the growing number of persons using them, we feel that this duty should be performed by an inspector who has a practical knowledge of their construction.

BOILER EXPLOSIONS AND INSPECTIONS.

During the year closing October 31st, no boiler explosions have occurred in any of the industrial establishments inspected by this Department. One person was scalded by the blowing out of a tube. However, there have been ten explosions of steam boilers in the State, five of which were boilers in saw mills which had never been inspected. Two persons were killed and six injured. There were also five explosions of traction engine boilers in which two persons were killed and ten injured. It is reasonable to suppose that if these boilers had been inspected and in charge of a competent man these explosions would not have occurred.

The present Boiler Inspection Law has been in operation but eighteen months, yet it evidently has accomplished some good. It should be amended slightly and made to apply to all boilers of

ten-horse power, including traction engines, for it has been upon these that the greatest number have been injured. The recent explosion of what has been termed a safety boiler in one of our large establishments emphasizes the importance of prohibiting the use of high pressure boilers in the basements of large buildings, and also the necessity of having those in charge of so destructive a force carefully examined and licensed before permitting them to have charge of such boilers. These are some of the precautions the State should insist upon for the protection of those who are compelled to pass a great part of their lives near such destructive agents.

VENTILATION.

The importance of furnishing a plentiful supply of fresh air to those within our buildings has been largely overlooked. We find that in many of our modern office buildings no attempt, whatever, has been made either to supply fresh air or to carry away the foul air. The modern office, heated by steam radiators, has none of the benefits of a grate or stove flue for the removal of impure air. The same lack of ventilation is found in most of our theaters, auditoriums, churches, schoolhouses and other places of assembly. Many of the attempts made at ventilation are futile and deceptive. All this should and could be remedied by fixing a legal standard of the quality and quantity of air breathed under the conditions above set forth.

It is a well known fact that sailors, lumbermen and other outdoor workers, who, on account of their vocation breathe pure air, are not affected either by tuberculosis or pneumonia, and that an abundance of pure air is the most successful cure for consumption. There are few of us who realize the ultimate evil of living or working in impure air. It is something more than the occasional development of consumption or contagion. It is really the greatest of all health destroyers.

Nearly all pupils in our public schools suffer from breathing impure air, and at a time when they need the greatest advantages for growth and mental and physical development. We send our children to school to improve their minds, yet how often are we tearing down the body?

No suggestion of this kind is worthy of the effort which it takes to write it if it be not given a practical turn. In the common-

wealth of Massachusetts the construction and maintenance of buildings for general and public uses in a manner to render the air contained therein impure is an illegal and punishable offense. Certain simple and direct requirements should be legally established and properly enforced by the machinery of government of this State.

To accomplish this purpose, I would suggest that all plans for theaters, churches, schoolhouses and all public buildings be submitted to, and receive the approval of an architect appointed for that purpose, who should be one who has made the subject of heating and ventilation a study. Each year there are several churches and schoolhouses destroyed by fire, the cost of any one of which would pay the salary of an expert in these lines. These fires are usually caused by an overheated furnace, which means a defectively constructed building. If these suggestions were carried out, we would then have some assurances that these buildings would be safe as to exits, pure air and absence of cold drafts of air.

ORDERS ISSUED.

The entire number of orders issued by the Department during the year was two thousand one hundred. Of these, two hundred and four were for fire escapes on public buildings, schoolhouses, hotels and lodge halls. One hundred and thirty-eight provided for the cutting of doors through halls or the construction of stairways on the inside of buildings, thus affording better means of egress in case of fire. The other one thousand seven hundred and seventy-six were distributed over all possible phases of factory safeguards, from covering a pool of scalding water formed by the leaking of a hot water pipe to that of replacing dangerous boilers with new ones.

The bakeshop orders, which were quite numerous, are included in the above. If "cleanliness is next to godliness," many of the bakers have moved upwards several degrees. The same remark can be applied with equal truthfulness to some of the manufacturers of ice cream, confections and preserves.

Very respectfully submitted,

DANIEL H. McABEE,

Chief Inspector.

RECAPITULATION AND COMPARISON WITH LAST REPORT.

	1904.	1903.

EXHIBIT A.

Tabulated Statement of Inspections Made

BY THE

DEPARTMENT OF INSPECTION OF INDIANA.

1904.

The following is an explanation of figures in column marked "Orders Issued and Complied With."

- No. 1. Relates to guarding of machinery and belting.
- No. 2. Relates to affidavits, registers, and the posting of laws, and names of those between the ages of fourteen and sixteen years.
- No. 3. Relates to toilet, wash rooms and resting seats.
- No. 4. Relates to elevators, hoisting shafts and stairways.
- No. 5. Relates to fire-escapes, exits, alarms and the posting of notices, in sleeping rooms, how to reach fire-escapes.
- No. 6. Relates to air space, water and ventilation.
- No. 7. Relates to bake-shop regulations.
- No. 8. Relates to inspection of boilers or anything pertaining thereto.
- No. 9. Unclassified.

Figures in black faced type indicate the orders that have been reported as having been complied with.

Notice.—November and December are months of 1903.

Detailed Statement of Accidents Reported

TO THE

DEPARTMENT OF INSPECTION

FOR

Year Ending September 30, 1904.

The following is an explanation of abbreviations used :

Extent of Injury : F.—Fatal ; Se.—Serious ; S.—Slight.

In order that the report may be more promptly issued, the accidents are reported up to and including September 30, 1904.

EXHIBIT C—INJURIES.

Number.	Date of Injury.	Name of City or Town and Person Injured.	Age.	Cause of Injury.	Nature of Injury.	Extent of Injury.	Time Lost in Days.	Wages Lost.	Wages Paid During Disability.	Benefits from Other Sources.	Burial or Medical Expenses.	By Whom Paid.	Dependent Persons.
89	Nov. 25	Aetna. Hoehner, Aug.	33	Explosion	Dismembered.	F.
561	July 19	Alexandria. Betts, Frank	26	Glass broke	Arm cut.	Se.	Company
61	Nov. 25	Byrum, Wm.	38	Shafting	Crushed	Se.	Company
580	July 26	Collins, Jules	86	Plate of glass broke	Leg cut.	Se.	30	\$60 00
160	Jan. 20	Davis, A. E.	21	Shafting	Shoulder and chest inj'd	Se.	28
43	Nov. 16	Rouchie, W.	35	Bank caved in	Lungs crushed	Se.	9	10 00
131	Dec. 31	Anderson. Chenington, John	47	Carelessness	Scalded	Se.	36	66 00	\$33 00	Company	2
372	May 6	Shipley, T. W.	Fall	Head cut and bruised	Se.	28	36 00	36 00	\$30 00	Company
373	May 6	Umbenour, Sam'l	Fall	Wrist sprained	Se.	36	27 00	27 00	100 00	Company
236	Mar. 16	Williams, Leo	16	Sleeve caught in auger	Arm broken	Se.
127	Dec. 28	Angola. Sowle, Lillie	Mangle	Hand amputated	Se.	60	36 00	\$127 00
347	Lynch,	Arcadia. Roy	24	Fell beneath car	Foot crushed	S.	75
173	Jan. 29	Attica. Butts, Manford	Circular saw	Finger lacerated	S.	6
542	Auburn. Jacobs, J. S.	30	Hand struck sand belt	Fingers lacerated	Se.	14	24 00	24 00
625	Aug. 11	Burtuet, Frank	21	Hand drill	Finger mashed	S.	1 25

532	May 26	Carrier, John.....	Shaper.....	Hand injured.....	S.....	475	8 25	74 34	25 00	3
229	Jan. 5	Dirrim, Allen.....	Carelessness.....	Four fingers cut off.....	Se.....	12
684	Sept. 16	Hite, Oscar.....	Unguarded shaper.....	Hand cut.....	S.....	21	24 45	1
263	Mar. 18	Seery, Jefferson.....	Joiner.....	Ends two fingers cut off.....	S.....	11	22 40	1
632	Sept. 13	Turner, John.....	Fall.....	Back injured.....	S.....
Batesville.												
144	Jan. 14	Fisher, August.....	Spindle shaper.....	Four fingers cut.....	Se.....	30	48 00	20 00	7 00	Company	1
117	Dec. 14	Kerns, John.....	Joiner. Guard removed.....	Hand cut.....	Se.....	14	15 00	5 00	Company
857	Oct. 23	Lightner, Richard.....	Joiner. Guard removed.....	Finger cut.....	Se.....	14	15 00	1 50	Company	2
306	Apr. 8	Livingston, C. A.....	Facer.....	Finger cut.....	S.....	Company
Bedford.												
825	Oct. 19	Fullen, George.....	Skid fell.....	Foot mashed.....	S.....	21	23 80	5 00	5 00	Ins. Co.....	2
21	Nov. 7	Watts, Alonso.....	Slab fell.....	Chest crushed.....	F.....
Bloomington.												
9	Nov. 9	Finley, A.....	Block of stone.....	Foot crushed.....	S.....	6
56	Nov. 23	Layne, R.....	Stone fell on foot.....	Foot amputated.....	Se.....	135	117 05	117 67	148 50	Em. & I. Co	1
827	Oct. 21	Reynolds, Arthur.....	Explosion.....	Eye injured.....	Se.....	30	40 00	19 50	Self.....
618	Aug. 9	Walden, Grover.....	Carelessness.....	Two toes amputated.....	Se.....
Bourbon.												
393	Aug. 21	Phebas, Clarence.....	Rip saw.....	Fingers sawed off.....	Se.....
Brazil.												
805	Oct. 7	Rodenbarger, Aaron.....	Jib crane.....	Skull fractured.....	F.....
Brookville.												
450	May 27	Colbank, Nelle.....	Punch, carelessness.....	Finger cut.....	Se.....	14	8 00	5 00	Company
705	Sept. 26	Gregg, Pearl.....	Carton machine.....	Finger off at 2d joint.....	Se.....	30	Company
285	Mar. 24	Peters, Frank.....	Filling tubes with straw.....	Shoulder and arm scalded.....	Se.....	70	90 00	8 00	Company	3

EXHIBIT D.

Selections from the 2,100 Orders Issued

BY THE

DEPARTMENT OF INSPECTION.

Showing the lines along which the Department is working, as well as the many phases of knowledge necessary for the proper discharge of the duties.

These orders are revised, corrected and mailed by the Chief Inspector on blanks prepared for that purpose from the office, 91 State House, where all communications with reference to same should be addressed.

EXHIBIT D.

Selections from the 2,100 Orders Issued by the Department of Inspection.

- Dec. 5. Abate the poisonous dust arising from grinding and mixing machines, in basement. The ingredients used must be ground and mixed in dust proof enclosures and carried by conveyers from one machine to the other, so that employes will not be compelled to breathe poisonous dusts arising therefrom. Furnish seats for females while at work, and provide cleaner and separate closets for use of employes, as law provides.
- Jan. 5. Provide shield to 16-inch crossbelt (on first floor, above basement) from main to counter shaft, 36 inches from floor, and near north end stairway to basement; inclose, with portable shield, cornmill belts, especially where passage way is narrow; protect all bevel gearing on end cross-shafts of Nordyke and Marmon bolting reels; provide shield for gearing on east end of Nos. 17, 18, 19, 20, fifth floor; cover or countersink all exposed set-screws in all parts of mill, on shafting or machinery, and posting law on each floor or story.
- Jan. 13. Make such changes as will insure more comfort to the employes of your factory by providing more heat and less smoke. The latter can be prevented from escaping into the workrooms by the proper arrangement of your chimneytop and the pipes from your stoves and furnace.
- Jan. 21. Cell with metal or lumber or plaster the entire space overhead, where creams are mixed and manufactured, in basement; remove all paper from walls and ceiling in candy department, second story, and cover same with hard paint that can be washed with soap and water; clear out all receptacles for trash and rubbish; exterminate vermin, and post sanitation law and expectorating notices.
- Jan. 27. Place water closet in machine room in serviceable condition and provide better drainage for waste water about same and from pumps, nearby; provide a sawdust box in water closet for men to expectorate in; report your accidents to this Department, and post permit for forty minute noon hour, which we enclose herewith.

- Feb. 6. Smooth the surface on the inside of each elevator well hole in your building, particularly that part facing elevator cage doors, as pointed out to your superintendent, Mr. Feasey, January 22d, by Deputy Inspector. No sharp projections or acute angles shall be exposed to the upward movement of car, endangering the feet of elevator operators and passengers when car is filled.
- Feb. 26. Employ no minors between the ages of fourteen and sixteen years without an affidavit from parents or guardian has first been provided and placed on file in your office, as to the age of such minor; guard against the danger of female employes bringing their heads in contact with lathe and buffing arbors by having girls wear a cap or net.
- Mar. 1. Permit no dogs or fowls in bakeshop; clean your cellar windows and admit more light and ventilation; clear out all debris; put all offal in garbage can and remove daily; flour in sacks must not rest on floor but be placed on platform; wash with soap and water all furniture and woodwork in bakeshop; clean wall and floors under and behind dough trough, pan cupboard, stairs and benches; limewash or paint side walls and ceilings, and post law and expectorating notices in bakeshop.
- Mar. 21. Put the men's water closets in good, sanitary condition by preventing water leakage from above and about the upper and lower closets; remove the old urine soaked seats and flooring; provide more room for each of the two closets, and thoroughly deodorize and disinfect all closets.
- Mar. 25. Provide safety gates at once at all elevator approaches; the gate guides must not be lag screwed into blocks set in the brick wall, but, instead, secured to the wall with bolts that pass through the wall with washer under nut; no casks or other portable material must be set in elevator doorways, inside of fire doors or safety gates.
- A rip saw guard attached to splitter behind the saw is suggested, as preferable for safety, to that of a suspended guard not connected with splitter.
- Mar. 26. Enclose with railing or elevated hood the floor opening about five feet long and twelve to fifteen inches wide, in power house engine room near fourth and fifth engine from the south and midway between engines and east wall; restore guards provided for rip saw, jointer and shapers in wood shop, and forbid their removal except for purpose of making repairs, and report your shop and power-house accidents to this Department.
- Apr. 7. Secure guards for elevator safety gates to the wall by at least one bolt on each side, through brick wall not more than thirty-six inches from floor line, and would advise two bolts on each side; provide elevator safety gates at each floor for

north elevator; cover or countersink the two exposed set screws on north end of south line shaft, on third floor and the set screws on short shaft between sander belts, south end of third floor; insist upon the use of guards on all shapers, ripsaws and jointers; post laws on each floor and registers in departments where minors are employed.

Apr. 14. Brush down, at once, all cobwebs; remove all trash outside; clean under and behind dough troughs and other shop furniture; scrub floor and wash all woodwork; provide shop windows with top outward tipping window screens, and lime-wash or paint all walls and ceilings.

Apr. 14. Provide hoods for gear at head of four vertical drill presses; provide shields for gear of shear and punch presses, in basement; provide rest hooks over shafting for idle belts (see shaft under enameling tanks) and hood over exposed set screw in chuck wood-shop basement; cover with leather such exposed set screws that can not be removed or replaced with flush heads; provide hood or shield over the swift revolving wire straighteners, on fourth floor.

Apr. 23. Discontinue, at once, the employment of minors under the age of eighteen years for the operation of elevator; employ no minor between the ages of fourteen and sixteen years without affidavit as to age from parent or guardian has first been provided and placed on file in your office; place no parcels, packages, wares or other material on shelves or floor projections inside of your freight elevator; provide safety gates on each floor of your freight elevator; cut doorway through board partition between carpet sewing-room and adjoining repair room, on west side, fifth floor; provide a drop ladder from window in repair room, fifth floor, to roof below, on southwest side of building, and post law on each floor.

May 27. Provide shields before gear and pinions over tubs No. 7, 8, 9 and 10, in run house; inclose exposed bevel gear and pinions in oil house over cookers, second floor; employ no minors between the ages of fourteen and sixteen years at any time without affidavit as to age from parent or guardian has first been provided and placed on file in your office.

June 3. Provide good lawful fly screens for bakeshop and skylight windows; remove garbage barrels back to fence; permit no shop water to be found on ground near shop doors; food products must not be set on brick wall outside of shop but upon table or platform, inside. Notice is hereby served for the adoption of better sanitary methods, both in and outside of bakeshop. Post new laws and notices.

June 22. Clear the window approaches to fire-escape by removing bars from across windows to west escape, on third floor, and shifting kettle twenty-four to thirty inches east or west, at fourth

floor window approach to west fire escape; post state laws and notices on second, third and fourth floor workrooms.

- July 29. Exclude flies from your mixing tanks and vicinity. If wire screens can not be successfully used, then blast fans of sufficient power and size must be placed and operated to prevent the collection of flies and their falling into the food product of your establishment.
- Aug. 23. Disinfect and deodorize the two outside water closets; make opening for ventilation twelve inches below roof, on east, west and south sides of each closet, with protection against rain and snow.
- Aug. 26. Cover the exposed, horizontal shaft on the outside of two washers, on second floor, and on one on the third floor; discontinue use of present lifting cable on elevator and replace same with new; arrange two water closets for use of female employes or one having two seats, separate and apart from any closet used by the men and boys of your laundry; post copy of factory law in each story.
- Sept. 27. Provide red lights and place one at the head and foot of each stairway, on the third floor, and at the intersection of all hallways; such red lights must be kept lighted all night. The third floor rooms must be provided with an individual fire-escape or knotted rope or chain, as required by law; place alarm gong between the west and central apartments, and one at head of small stairway on New Jersey street side.
- Oct. 6. Remove, at once, three exposed, protruding set screws in collars over rattler on counter shaft, near doorway, one on line shaft over doorway near elevator, one on line shaft at union, near elevator; connect large swing cutoff saw to wall with check chain; inclose the under half of beveling saw and provide metallic guard over top of same; safely enclose under part of dado saw on which Jesse Miller was injured, and report, without fail, your accidents to this office.
- Jan. 26. Provide a fire proof curtain for proscenium, or curtain opening, of your theater; provide hand rails on all stairways on both sides, where convenient; provide outward swinging, exterior doors; cut down the south window in gallery, making a door, and the north window in balcony; make both doors swing outward; erect a balcony at south door, in gallery, with stairway running down to north door in balcony; provide balcony and stairway running from this door (with extra bracket) down to within nine feet of alley, with counterbalance stairs to alley; stairs to be not less than three feet wide; post notices descriptive of all means of escape.
- Jan. 26. Provide a fire proof curtain for proscenium, or curtain opening, of your theater; remove the four steps in the north and south

aisles, on the first floor, and substitute an incline plane; remove center post from inside storm doors, at main entrance, and make the opening same as the outer doors; paint the word "EXIT," conspicuously, over all outlets; providing a red light over all exits, installed on an independent circuit.

- Jan. 26. Provide a fire proof curtain for proscenium, or curtain opening, of your theater. Post in large letters the word "EXIT" over all outlets; have a red light burning over all exits, connected with an independent circuit; provide stand pipe connected with city water works on stage with twenty-five feet of hose and nozzle attached, and provide hand rails for main stairs.

- Feb. 13. Remove seats on both sides of aisle in gallery, on line with outside of each door to rear of chairs, next to center aisle; extend hand rail on gallery stairs to foot of wide stairs in main corridor; place hand rail in center of main steps in main corridor; the upper post should not be less than six feet high.

- Mar. 2. Provide a fire proof curtain for proscenium, or curtain opening, of your theater and hanging it with cable; cut off banister of gallery stair so as not to interfere with the main outlet; mark the word "EXIT" over all outlets and have an independent light burning to show the same; provide hand rails for gallery stairs; erect fire escape by making a door of second window from north side on east end of building, stairs dropping down to balcony and balance stairs to ground; provide stand pipe and 25 feet of hose and nozzle attached for the stage.

- Mar. 12. Cut doors on east and west side of balcony twenty feet from head of stairs, doors to be five feet wide; the one on west side leading to balcony landing with 36-inch stairs to ground, at an angle of not more than forty-five degrees; the east door opening out on to roof of one story building; make an aisle, three feet wide, in center of balcony through seats from front to rear; provide an exit from dressing rooms under stage; procure a curtain of some incombustible material for proscenium, or curtain opening, of your theater; connect with city water mains for water pressure with hose and nozzle on stage; place ventilator in roof over center of stage to give outlet to smoke in case of fire. Place a red light over each exit, current to be supplied by an independent wire or circuit; have each exit marked in plain letters, not less than three inches in length, the word "EXIT."

- Mar. 12. Provide a fire resisting curtain of some incombustible material for proscenium, or curtain opening, of your theater; place ventilator in roof over center of steps to open automatically in case of fire; place ventilated thimble around all steam pipes where passing through wood or studding partition; mark

all exits in plain letters, not less than three inches long, with the word "EXIT"; keep a red light burning over each exit, during all performances at night; these lights to be on an independent circuit; widen center stairway to balcony to five feet; cut a five-foot door through partition at foot of said stairs; swing doors at foot of other stairs outward; bolts on all outside doors should be so arranged as to be forced open by little more than ordinary pressure.

- Apr. 20. Erect six fire escapes on hotel; three on south side of building and three on north side (one in each of the wide, eight-foot courts); balconies enclosing one window in each room opening on court at fifth, fourth, third and second floors with drop ladders from second floor balcony to ground.
